

THE DISASTER MANAGEMENT ACT, 2005

Background

The Disaster Management Act, 2005 forms part of the legislative and administrative framework governing public administration, land governance, and regulatory systems in Andhra Pradesh and Telangana.

Purpose

The legislation or manual provides legal and administrative guidelines for governance, public administration, regulatory compliance, and implementation of government policies.

Key Provisions

- Establishes regulatory and administrative powers of government authorities.
- Defines procedures for governance, implementation, and administrative oversight.
- Provides frameworks for public administration, land governance, and policy execution.
- Creates institutional mechanisms for enforcement and compliance.

Administrative Importance

These laws, manuals, and administrative rules support effective governance, institutional administration, and regulatory oversight within various departments of the government.

Modern Relevance

They continue to influence current administrative systems, regulatory frameworks, and policy implementation across multiple sectors including land administration, planning, and governance.

Additional Notes

These documents are commonly referenced by administrators, legal professionals, and policy researchers studying governance systems, administrative law, and revenue administration in Andhra Pradesh and Telangana.
